

# エントリー表で修正の多い部分

The image shows a Microsoft Excel spreadsheet with two side-by-side entry forms for a soccer tournament. The spreadsheet interface includes a ribbon with various tabs and a task pane on the right. The entry forms contain fields for team name, representative name, address, contact information, and a list of players with their positions and numbers. Three callout boxes highlight specific issues:

- 【確認①】** (Confirmation 1): Points to the '地域' (Region) and 'ブロック' (Block) fields in the header of the left form, which are empty. The text says: "地域、ブロックが未記入の場合があります。" (There are cases where region and block are not entered.)
- 【確認②】** (Confirmation 2): Points to the 'コーチ氏名' (Coach Name) field in the left form, which contains multiple entries. The text says: "コーチを複数人入力することで枠内に収まらない場合が発生します。" (By entering multiple coaches, it can happen that they won't fit within the frame.)
- 【確認③】** (Confirmation 3): Points to the player list table in the right form, where a vertical dashed line is visible. The text says: "コピー&ペーストにより、このラインまでコピーされてしまいます。相手用（青枠）をコピーし、審判用へペースト（貼付）すると、エントリー表の中心にある破線（-----）がコピーされてしまいます。" (Due to copy & paste, it is copied up to this line. If you copy the opponent's form (blue frame) and paste it into the referee's form, the vertical dashed line in the center of the entry form will be copied.)
